DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

I. **Claims 1-11 & 19-25**, drawn to a device equipped with optical interfaces/transceivers to interconvert electronic signals and optical signals input for realizing beam-forming in CDMA system, classified under class 455 subclass 562.1.

II. **Claims 12-18, & 26** drawn to a method for cancelling interference by reflecting fixed beams to corresponding sectors using different time delays in CDMA system, classified under 375 subclass 144.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

3. **Group I** is drawn to an infrastructure wherein a device is employed to interconvert electronic signals and optical signals input for realizing beam-forming in CDMA system. The conversion is performed using optical interfaces/transceivers. **Group II** is drawn to a method wherein beams are reflected to concerned sectors with a different duration or

a time delay in order to cancel the interference. **Groups I and II** are two distinct inventions with separate utility on its and would require the examiner to search in different areas as is provided with the different subclasses above. For this reason, restriction for examination purposed as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
